PROFESSIONAL SUMMARY

Results-driven **Junior Business Intelligence Analyst** skilled in transforming complex raw datasets into **actionable insights** using **SQL**, **Power BI**, and **Excel**. Adept at designing interactive **dashboards and reports** to track **Key Performance Indicators (KPIs)** and optimize **data-driven decision-making**. Collaborative communicator experienced in **data modeling**, data cleaning, and translating business requirements into technical solutions for **cross-functional stakeholders**.

TECHNICAL SKILLS

Languages: SQL (Advanced), Python(Advanced)

BI & Visualization Tools: Tableau, Power BI, Google Data Studio, Excel (Advanced - Pivot Tables, VLOOKUP)

Databases & Warehousing: PostgreSQL, MySQL, SQL Server, Dimensional Modeling, Star Schema, ETL Concepts

Cloud & Big Data: AWS (Redshift, S3), Google Cloud (BigQuery), Azure, Apache Spark

Analytics & Tools: Statistical Analysis, A/B Testing, Cohort Analysis, Git / Version Control

Core Competencies: Data Storytelling, Data-Driven Decision Making, Cross-Functional Communication, Problem Solving

EXPERIENCE

Market Analyst Intern

June 2026 – August 2026

WRINGG

Bangalore, Karnataka

- Spearheaded **customer retention analysis** and **churn prediction** initiatives, analyzing behavioral datasets to identify high-risk user segments and propose targeted mitigation strategies.
- Optimized **rider price management** frameworks and conducted comprehensive **competitor analysis**, leveraging market trends to balance user acquisition with revenue goals.
- Contributed to core Application **Product Requirements Documents (PRDs)** by defining **Key Performance Indicators (KPIs)** and building **data visualizations** to deliver actionable insights to cross-functional teams.

PROJECTS

SaaS Revenue & Churn Analytics Dashboard | *SQL, Power BI, Python (Pandas)*

September 2026

- Engineered an end-to-end ETL pipeline using Python and SQL to extract, clean, and load 100K+ transactional records into a centralized PostgreSQL database.
- Designed a robust Star Schema data model to facilitate complex queries and optimize reporting performance for multi-year financial datasets.
- Developed an interactive Power BI dashboard tracking Monthly Recurring Revenue (MRR), Customer Acquisition Cost (CAC), and cohort-based churn rates.
- Formulated actionable insights identifying a 12% revenue leakage in mid-tier subscription plans, simulating targeted data for retention campaigns.

Supply Chain & Inventory Optimization Model | *Python, Excel (Power Query, DAX), SQL*

August 2026

- Analyzed historical sales and logistics data to identify seasonal demand patterns and optimize inventory reorder points across multiple distribution centers.
- Utilized Python for data wrangling and statistical analysis to predict stockout risks and mitigate excess inventory holding costs.
- Automated data transformation workflows using Excel Power Query, effectively reducing manual weekly reporting time by over 10 hours.
- Created dynamic Excel dashboards using advanced DAX measures to visualize inventory turnover ratios and supplier lead-time bottlenecks.

EDUCATION

Dhanalakshmi Srinivasan University

Bachelor of Technology in Artificial Intelligence and Data Science

Trichy, Tamil Nadu

August 2023 – July 2027
